

Mufid Alkhamami

Data Analyst & Business Intelligence

Location: Dubai, United Arab Emirates.

Email: alkhamami.mufid@gmail.com

Phone Number: +971 55 814 5658

LinkedIn: <https://www.linkedin.com/in/mufid-alkhamami/>

Objective

System Analyst with expertise in Business Intelligence, Data Analytics, Process Automation, and Digital Transformation. Experienced in designing and delivering enterprise solutions using Microsoft technologies: Power BI, Power Automate, SharePoint, and Power Apps to drive operational efficiency, improve data quality, and support strategic decision-making. Seeking to leverage strong analytical, technical, and stakeholder management skills to deliver innovative, data-driven solutions that create measurable business value and accelerate digital transformation initiatives.

Education

Bachelor of Information Technology

Damascus, Syria | October 2019 - February 2024

International University for Science and Technology.

Leadership and Achievements [Google Drive](#)

Developed a Power BI dashboard to automate exam conflict detection in collaboration with the Dean of IT departments, presenting the solution to the University Owner and senior leadership; eliminated manual paper-based processes, delivered real-time conflict insights, and saved over two weeks of manual work for students and administrative staff.

Work Experience

ADNOC (Abu Dhabi National Oil Company)

System Analyst

Abu Dhabi | United Arab Emirates | On-site | Full Time | November 2025 - Present

- Successfully delivered and supported **50+ enterprise Power BI dashboards** and reporting solutions across Treasury, Finance, Credit Risk, Operations, Procurement, Research, and Executive Management functions.
- Designed and implemented multiple **end-to-end automation** solutions using Power Automate, Power Apps, Microsoft Forms, SharePoint, and AI capabilities, significantly reducing manual effort and operational risk.
- Developed an innovative **Power BI export solution** that overcame the platform's standard row limitation, enabling users to extract millions of records through automated Power Automate integration.
- Designed and implemented **Role-Based Access Control (RLS)** for business-critical dashboards, ensuring secure and compliant access to sensitive data.

- **Automated numerous business workflows**, including insurance requests, feedback management, approval tracking, task management, newsletter distribution, incident reporting, and license renewal monitoring.
- Delivered complex **reconciliation and validation solutions** between Finance systems, improving financial reporting accuracy and strengthening controls.
- Consistently resolved **critical production issues**, refresh failures, data quality problems, and integration challenges, ensuring uninterrupted availability of reporting platforms.
- **Recognized by management and business stakeholders** for delivering innovative solutions that addressed platform limitations, improved user experience, and accelerated digital transformation initiatives.

Unity Partners

Data Analyst

Dubai, United Arab Emirates | On-site | Full Time | October 2024 - October 2025

- Designed and deployed executive-level Power BI dashboards across sales, marketing, operations, and finance, **eliminating 65+ hours of manual reporting monthly**.
- Played a key role in boosting **sales by 15%** by identifying a one-hour delay in sales coordinators' follow-up with new leads and presenting solutions to fix it.
- Transformed raw CRM **data into story telling** and **actionable visual insights**, improving cross-functional alignment and decision speed.
- **Built ETL pipelines** using Python and SQL to extract and clean data from Zoho CRM and internal systems, boosting reporting reliability and performance.
- Created a submission tracker that **improved client satisfaction by 45%**, reducing project delays and increasing workflow transparency.
- Partnered with stakeholders to define business **KPIs**.
- Managed ongoing dashboard optimization, stakeholder feedback loops, and internal training for **improved dashboard adoption**.
- Performed CRM data structure cleanup to **enhance data integrity for analysis and visualization**.

Lemonilab

Data Analyst

Damascus, Syria | On-site | Full Time | February 2023 - November 2024

- Led data cleaning, migration, and dashboard development using SQL, Python, and Power BI, enabling faster insight-driven decisions in **Hamdan Bin Rashid Al Maktoum foundation**.
- Built and maintained Power BI dashboards to analyze employee performance and workflow efficiency, resulting in a **17% increase in team productivity** and enabling data-informed operational improvements.
- **Collaborated** with the Sales team to develop forecasting models and machine learning algorithms that predicted pricing ranges for services, reducing contracting time by 2 days and improving commercial agility.

- Supported strategy and product development teams with data-driven insights and feasibility analysis for new service offerings and expansion opportunities.
- Delivered analytics and visualization solutions using Power BI for external clients in the USA, Monaco, and the UAE, providing business insights for strategic planning and decision making.
