

MUFID ALKHAMAMI

Business Intelligence Developer | Power BI & Microsoft Power Platform | Reporting Automation

Abu Dhabi, United Arab Emirates • +971 55 814 5658 • alkhamami.mufid@gmail.com • [linkedin.com/in/mufid-alkhamami](https://www.linkedin.com/in/mufid-alkhamami)

PROFESSIONAL SUMMARY

Business Intelligence developer and System Analyst specializing in enterprise Power BI delivery, semantic model performance, reporting automation, and financial data reconciliation. Sole Power BI specialist within a Microsoft Power Platform team at ADNOC, owning 50+ dashboards for eight departments on a Microsoft Fabric lakehouse alongside SQL, SharePoint, Web API, and Excel sources. Builds the capability the platform does not ship with — automated report distribution, multi-million-row extracts — and engineers models that hold at scale, including a reconciliation solution that replaced a month-long manual cycle and a 30M-row model tuned from four minutes to eight seconds. Trilingual in Arabic, English, and Russian.

CORE SKILLS

Business Intelligence & Visualization: Power BI (Desktop, Service, Gateway), Microsoft Fabric, DAX, Power Query (M), semantic model design, dataflows, incremental refresh, performance tuning (DAX Studio, Performance Analyzer), dashboard design, report distribution, Row-Level Security (RLS), workspace & access management, scheduled refresh management, dashboard design and UI/UX (Figma)

Automation & Microsoft Power Platform: Power Automate, Power Apps, Microsoft Forms, SharePoint, approval and notification workflows, automated PDF report generation and email distribution, AI-assisted email and document processing in Power Automate, HTML/CSS email templating for automated alerts

Data & Analytics: SQL, Python, ETL / ELT, data cleaning and migration, data reconciliation and validation, data quality analysis, large-dataset handling, forecasting and predictive modeling, Excel, BigQuery

Data Sources & Platforms: Microsoft Fabric lakehouse, SQL databases, SharePoint lists, Web API / REST integration, Excel, Zoho CRM, Microsoft 365, enterprise finance systems

Business & Professional: Business requirements gathering, stakeholder management, cross-functional collaboration, KPI definition, data storytelling, user training and adoption, production support and troubleshooting

Languages: Arabic — Native | Russian — Native | English — Fluent

PROFESSIONAL EXPERIENCE

System Analyst | ADNOC (Abu Dhabi National Oil Company)

Abu Dhabi, United Arab Emirates | On-site, Full Time | November 2025 – Present

- Own the Power BI function as the sole Power BI specialist within a Microsoft Power Platform team, managing 50+ enterprise dashboards used by eight departments — Treasury, Finance, Credit Risk, Operations, Shipping, Procurement, Research, and Executive Management — sourced from a Microsoft Fabric lakehouse, SQL databases, SharePoint lists, Web APIs, and Excel, and covering connectivity, scheduled refreshes, troubleshooting, and enhancements.
- Replaced a month-long manual reconciliation cycle that occupied a team of five with an hourly-refreshing Power BI reconciliation dashboard, allowing a single user to identify and correct discrepancies across enterprise systems continuously instead of in a monthly batch — strengthening financial reporting accuracy and internal controls.
- Rebuilt the semantic model behind a 30M+ row reconciliation dashboard after identifying it as the performance bottleneck, cutting page load time from four minutes to eight seconds and making the report usable for day-to-day financial reporting rather than periodic review.
- Developed a Power Automate export solution that works around Power BI's standard export row limitation, enabling business users to extract datasets of up to 15 million rows and giving them direct access to large-volume data that was previously unavailable through the platform.
- Built a self-service Power Automate and Power BI reporting flow for the Human Capital team that generates weekly employee attendance PDF reports — looping through the employee set selected in the report, compiling weekly totals per row, and emailing the completed pack back to the user who triggered it. In weekly production use by the Human Capital team.
- Built 30+ automations using Power Automate, Power Apps, Microsoft Forms, and SharePoint — covering insurance requests, approval tracking, task management, incident reporting, and license renewal monitoring — including AI-driven flows that read incoming emails and extract required fields automatically, eliminating manual data entry at intake.
- Designed and implemented Row-Level Security (RLS) and manage workspace access for business-critical dashboards, ensuring sensitive data is visible only to authorized users and access remains compliant.

- Gather requirements directly from business stakeholders and design BI solutions end to end — building semantic models, dataflows, DAX measures, and incremental refresh policies through to visualization and rollout — and extend business logic and measures as rules change so reported figures stay consistent with source systems.
- Resolve production issues, refresh failures, data quality problems, and integration challenges across the reporting estate, protecting the availability and reliability of enterprise reporting platforms.
- Commended by the Treasury team lead, the Shipping and Operations manager, and stakeholders across other departments for solutions that overcame platform limitations and improved access to business reporting.

Data Analyst | Unity Partners

Dubai, United Arab Emirates | On-site, Full Time | October 2024 – October 2025

- Designed and deployed executive Power BI dashboards spanning sales, marketing, operations, and finance, replacing 65+ hours of manual reporting per month with self-serve reporting for leadership.
- Analyzed CRM lead-handling data and surfaced a one-hour gap between lead capture and sales-coordinator follow-up; presented the finding and a corrective process to leadership, which was adopted ahead of a 15% rise in sales.
- Built ETL pipelines in Python and SQL to extract, clean, and load data from Zoho CRM and internal systems, and restructured the CRM data model to remove the inconsistencies undermining reporting reliability.
- Built a client submission tracker giving delivery teams and clients a shared view of project status, reducing project delays and raising the client satisfaction score by 45%.
- Defined business KPIs with department stakeholders and ran internal training that drove dashboard adoption across teams.

Data Analyst | Lemonilab

Damascus, Syria | On-site, Full Time | February 2023 – October 2024

- Led the data cleaning, migration, and dashboard build for the Hamdan Bin Rashid Al Maktoum Foundation, consolidating legacy records in SQL and Python and delivering the Power BI reporting layer on top of them.
- Built Power BI dashboards exposing employee performance and workflow bottlenecks to operational managers; team productivity rose 17% over the following period.
- Developed forecasting and machine learning models with the sales team to predict service pricing ranges, cutting two days from the contracting cycle.
- Delivered Power BI analytics for external clients across the USA, Monaco, and the UAE, supporting strategic planning and feasibility analysis for new service lines.

EDUCATION

Bachelor of Information Technology | International University for Science and Technology

Damascus, Syria | October 2019 – February 2024

- Developed a Power BI dashboard automating exam conflict detection with the Dean of IT, and presented it to the University Owner and senior leadership; the solution replaced a paper-based process with real-time conflict detection and removed over two weeks of manual work for students and administrative staff.

CERTIFICATIONS

[View all certificates \(Google Drive\)](#)

- Microsoft Power BI Data Analyst
- Google Advanced Data Analytics | Google Data Analytics
- IBM Data Science | IBM Advanced SQL
- BigQuery for Data Analysts
- Oracle Data Visualization Challenge 2025
- McKinsey Forward Program

LEADERSHIP & COMMUNITY INVOLVEMENT

- Grew the Russian Youth in Syria organization from 6 to 100+ active volunteers through outreach and structured recruitment.
- Led humanitarian and cultural initiatives — aid projects for nursing homes and orphanages, Ramadan food distribution, Russian cultural events — and volunteer with the UAE national volunteering program.
